

Although the Hospitalization project strategies support reduction of all-cause hospitalizations, readmissions, and emergency department visits, only those Medicare claims from the Primary Diagnosis Categories list (see below) are counted towards the rates. The data comes directly from Medicare claims. Also please note, a readmission is counted towards the rate if it is from the Primary Diagnosis Categories AND has occurred within 30 days of discharge from the hospital following an admission from the Primary Diagnosis Categories. Please note, this does not apply to rate calculation for the QIP.
