

Readmissions/Transitions in Care Improvement Sprint

Superior Health Quality Alliance (Superior Health) is excited to offer the Readmissions/Transitions in Care Improvement Sprint for hospitals and dialysis facilities. An improvement sprint is a rapid implementation program designed to amplify the impact of your facility's efforts around a given topic, such as readmissions/transitions in care.

Through the improvement sprint, Superior Health is committed to offering continued support to hospitals and dialysis facilities by:

- Hosting four learning webinars with Superior Health partners in Michigan, Minnesota, North Dakota, South Dakota and Wisconsin.
- Sharing contemporary evidence-based tools and educational resources to assist participants to identify gaps, opportunities and track progress.
- Facilitating in-depth learning and fostering interactive dialogue across Superior Health, highlighting concrete concepts, operations, guidelines and policy development, best practices and tactical steps to implement innovations at your hospital/dialysis facility.
- Offering group collaboration in the social networking site – Superior Health Connect.
- Scheduling state-specific one-on-one coaching calls with your quality improvement advisor (QIA).

Who should participate:

- Multidisciplinary team members from your organization who are empowered to identify, develop and implement strategic approaches to address readmissions/transitions in care; Teams may include quality leaders, nurse managers, social workers, provider champions, as well as anyone with the shared commitment to making a positive impact on reducing avoidable readmissions and improving transitions in care.
- Great opportunity to engage your Patient and Family Advisory Council (PFAC) or Patient and Family Advisors (PFAs) in quality work!

Participant Requirements:

- Attend all learning webinars – dates are included on the next page.
- Complete assigned road map assessment – Michigan and Wisconsin hospitals will complete in [KeyMetrics](#). Minnesota hospitals should complete the road map in the [Minnesota Hospital Association's data portal](#). Dialysis facilities will complete an online assessment.

- Complete assigned 'Desired Performance Statement' worksheet to assess your current state, desired state, gaps that exist and the behavior changes needed to reach your desired goal.
- Complete the 'Implementation Plan Worksheet' to determine how the desired behaviors will be accomplished and how other factors influencing desired performance will be addressed.
- Assignment due dates are listed below.
- Participate with your state QIA in a one-on-one coaching call.
